

TENAXFIL EXTREME®

TENAXFIL EXTREME® is a sewing thread made by Cittadini spa, produced with Dyneema® fiber or UHMWPE fiber and provides an incredible specific tenacity, which allows to reach tensile strengths that it is impossible to match with other synthetic yarns, and at the same time offering and extremely light weight

TENAXFIL EXTREME® is a sewing thread with a high resistance to abrasion with a superior cut-proof and a good resistance to UV, weathering, acids in general and mildew.

TENAXFIL EXTREME® is the perfect solution to maintain optimal performance expectations in terms of retention of tensile strength and integrity of the fiber in very humid environments or sea operation situations.

Ticket Nm	Make-up (standard)
40	3.000 mt
20	1.500 mt
10	500 mt
6	1kg

Packaging : box of 12 spools

Main applications:

- Military and aerospace sectors
- Protective wear and footwear
- Filtration
- Fishing and aquaculture
- Technical and special products

Key benefit:

- Super high tenacity
- High abrasion resistance
- High chemical resistance
- Low weight
- Resistant to UV radiation
