

## NYLON MONOFILAMENT KNOTTED NET

Knotted net, exceptionally rich in fish and transparent in the sea, used for drift and sport fishing, produced in high tenacity nylon monofilament, double-knot, to ensure the best knot-holding, in different thicknesses, usually in natural colour; it can also be customised in colours and reinforcements, according to particular needs.

### Characteristics:

- High transparency and elasticity.
- Excellent abrasion resistance.
  
- Excellent mesh stability
- Remarkable softness.

This net is particularly suitable to be used as a post net.

Title	Standard Production	Mesh size	Lenght
