

## NYLON BRAIDED NET

### Characteristics:

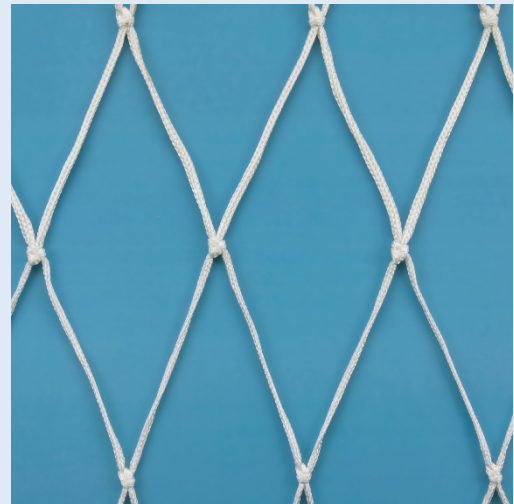

Knotted net mainly used in industrial fishing where high net strength is required.

It is usually produced with a single knot, in different colours and with the possibility of a polymerisation treatment to increase its resistance to abrasion.

The braided knotted net offers :

- considerable tensile strength;
- excellent abrasion resistance.

It is particularly suitable to be used as a surrounding net.

Knot	Standard Production	Mesh size	Net lenght
Single	Braid diameter Ø 0.8, 1, 1.15, 2, 2.5, 3, 3.5, 4, 4.5, 5, 6	From 15 mm up to 800 mm and more	Upon request
