

POLYETHYLENE KNOTLESS NET

This net is produced with a special high-density HDPE yarn, stabilised and treated against UV, which guarantees excellent resistance to abrasion and the bite of marine predators, making it very suitable for cages with on-site washing.

It is normally weaved without a ladderproof knot in a diamond mesh to make it easier to frame. Colours green or black.

Characteristics:

- Excellent abrasion resistance
- High resistance to the bite of marine predators
- It does not absorb water

Titles	Mesh size	Net width	Net length
PI 2 - PI 4 - PI 6 up to PI 21	From 2.5 mm upwards	Up to 980 meshes	Upon request
